Why Become an ITOT?

If you're a licensed occupational therapist looking to expand your position in the rapidly-growing area of concussion rehabilitation and management, the ImPACT Trained Occupational Therapist (ITOT) program offers streamlined and affordable ways to:

Learn Best Practices in Concussion Rehabilitation

Your ITOT training will include valuable education on core concussion management processes including OT post-concussion intervention techniques, concussion clinical trajectories, vision and vestibular rehabilitation, and return to learn interventions for the OT.

Offer Industry-Leading Concussion Rehabilitation to Your Patients

ImPACT Applications provides training that has been medically accepted as state-of-the-art best practice. As our product suite grows and as research drives new innovations, your patients benefit from the latest advancements in concussion management research and clinical methodologies.

Grow Your Practice

Credentialed ImPACT Consultants (physicians, physician assistants, psychologists, and nurse practitioners) frequently seek ITOTs to partner in post-injury care. Tap into networking opportunities to grow your business as part of a multi-disciplinary concussion management team.

Gain a Competitive Edge

Increase your exposure through a listing on ImPACT Applications website. Stay current with relevant, evidence-based training delivered by pioneers in the field.
